**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	Application No. 10/532,651	Applicant(s) MIYAMOTO ET AL.	
	Examiner An H. Do	Art Unit 2853	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 02 October 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

### DETAILED ACTION

The Amendment filed on 02 October 2006 has been acknowledged.

#### ***Information Disclosure Statement***

1. The information disclosure statements (IDS) submitted on 05 June 2006 and 08 November 2006 were filed and are being considered by the examiner.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyamoto et al (JP 2003237089).

Miyamoto et al disclose in Figures 4-9 the following claimed features:

Regarding claims 1 and 3, a liquid ejecting device comprising: at least one heating element (22) and at least one metal oxide field effect transistor (28) to drive said heating elements (22) which is formed such that said heating element is distally located from, and driven by said metal oxide field effect transistor (28), so as to heat a liquid contained in a liquid chamber (30), thereby ejecting said liquid, characterized in that said metal oxide field effect transistor (28) has a polycide gate or a metal gate (G).

Regarding claim 4, Miyamoto et al also teach a process for production a liquid ejecting device in view of the fact that the above structure is taught.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miyamoto et al (JP 2003237089) in view of Silverbrook (US 5,841,452).

Miyamoto et al disclose the claimed invention except for reciting the gate has a gate length no larger than 2  $\mu\text{m}$ .

Silverbrook teaches the gate has a gate length no larger than 2  $\mu\text{m}$  (column 27, lines 65-67).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the gate has a gate length no larger than 2  $\mu\text{m}$ , as taught by Silverbrook into Miyamoto et al, for the purpose of getting advantage of using a very fine process (column 27, lines 64-65).

***Response to Arguments***

6. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection. The newly found reference of Miyamoto et al (JP 2003237089) discloses the claimed invention as discussed above.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Contact Information***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to An H. Do whose telephone number is 571-272-2143. The examiner can normally be reached on Monday-Friday (Flexible).
